

INP&ID[©]

A Mobile Enabled WiseTools Productivity Tool

BENEFITS

- **Web app** – use Microsoft Edge, Google Chrome, or Safari browser.
- **User Friendly** – intuitive and easy to use.
- **No passwords** required.
- **Cost Effective** – Does not require a SPPID or SPI license.
- **Simple and easy** to digitally integrate your SPPID, CAD or PDF P&ID drawings with your SPI instrumentation database and document management system.
- **Automatic conversion** to PDF of SPPID or CAD P&ID drawings.
- Automatic hotlinking of the instrument bubbles, equipment numbers, line numbers & interlocks.
- Automatic hotlinks from the off Page connectors.

SPI COMPATIBILITY

- 2016, 2018 & 2019
- Oracle or SQL
- Engineering and As-Built/OO configuration

MOBILE ENABLED

- Designed to function on a PC or tablet.

What is INP&ID?

INP&ID[©] is a web application that integrates P&ID drawings, SPI instrumentation data and related entity documents using a simple and intuitive graphical user interface on a PC or tablet. INP&ID supports a mixture of SPPID drawings and CAD drawings (dwg or dgn) and can access related P&ID and instrument entity documents from either a file server or a document management system.

Use Global Search to find a P&ID drawing(s) or to find specific entities (instrument, equipment, line or interlock tags) on a P&ID drawing(s). Click a resulting entity to zoom to it on the P&ID. Click an instrument and the related P&ID drawing opens, with the option to zoom to any instrument tag on the drawing. Instrument properties, datasheets and loop drawings can be accessed by clicking an instrument bubble on the P&ID or from the instrument list.

Features and Benefits

- INView P&IDs are now integrated with INP&ID. Click an INView P&ID drawing hotlink to open the drawing in INP&ID and benefit from all its advanced features.
- SPPID and CAD P&ID drawings supported.
- Batch converts native P&ID files to intelligent PDF drawings linked to the INP&ID database.
- When an instrument, line number or equipment number is selected from the entity list, INP&ID automatically zooms to the entity on the P&ID.
- Click an off page connector on the P&ID drawing to open the related P&ID.
- Click instrument bubbles to view:
 - tag properties,
 - custom table and field data,
 - datasheets,
 - loop and segment drawings,
 - panel strip wiring reports,
 - HU installations,
 - instrument and panel wiring photos,
 - external documents (those saved on a file server or on a document management system) such as control narratives, logic diagrams, line list, vendor documents,
 - archived datasheets, loop and segment drawings, process data reports and panel strip reports are automatically converted to PDF format for easy viewing.
- Global as-typed search for instruments, line numbers, interlocks and equipment numbers to retrieve and open the related P&ID drawing(s).
- Use Plant Area Unit/Project filters to narrow searches in the P&ID entity list.
- Built in Audits to identify entity mismatches between P&ID drawings and the SPI database.

P&ID Links to Instrument Data, and Document Management

SYSTEM REQUIREMENTS

SERVER:

- Windows Server 2016, 2019; 64-bit
- IIS v10
- .Net v6.0 and ASP.NET Core Runtime v6.0
- MS Visual C++ Runtime
- PDF Reader
- SmartSketch Viewer
- INAPI

CLIENT:

- Windows v10 or v11, iOS, Android
- .NET Framework v4.6+
- Microsoft Edge , Google Chrome or Safari
- PDF Reader
- Microsoft Excel
